

Libro 800 Overhang Beam

800kg
Safe Working Load

Compact Overhang Beam

The Libro 800 is a compact overhang beam, which is able to lift loads up to 800kg. This counterweight balancer is capable of installing glass, curtain walling and cladding below overhangs of up to 1550mm and can lift loads at full capacity at each working length.

The Libro 800 overhang beam features an integrated hook and can be used with a below-the-hook vacuum lifter, which are also offered for hire or sale from Spider Plus. This compact overhang beam can be attached to both mobile or tower crane and is suitable for installation projects at height. The Libro 800 features an anti-tilt switch, which stops the counterweight balancer tilting past $\pm 10^\circ$ for safety.

Libro 800 is fitted with a rechargeable battery to power the adjustable 30 counterweight rack and pinion saddle. Controlled by cable remote, the counterweight saddle can be moved along the beam to balance the load being lifted.

Dimensions

Cable remote control for saddle

Note:

The weight of load and vacuum lifter combined cannot exceed 800kg

Technical Specifications

Safe working load	capacity	800kg
Weight of lifter	with 24 counterweights without counterweights	810kg 210kg
Working Lengths	mm	550, 800, 1050, 1300, 1550mm
Depth of overhang	max	1550mm
Balance control	control:	Rack and pinion counterweight saddle
Power requirements	options:	24V DC rechargeable battery 110/240V battery charger
Standard accessories	standard:	• Cable remote control to operate • Counterweight saddle

Key Features

- Capacity: 800kg
- Integrated hook
- $\pm 10^\circ$ Anti-Tilt Switch
- Cable remote control for counterweight saddle
- Weight:
 - 810kg approx. (with counterweights)
 - 210kg approx. (without counterweights)
 - 1 counterweight = 25kg
