

# LIFTROLLER

## WHEELED CARRIER

### WHEELED CARRIER

**Liftroller Wheeled Carrier – electric goods trolley with remote control.**

**The Liftroller Wheeled Carrier is an electric goods trolley with remote control designed for easier and more efficient handling of materials on building sites.**

**The rollers are equipped with a brake function to secure the load while the trolley is in motion. The built-in safety functions ensure that the trolley does not move until the locking mechanism on the rollers has been activated. Nor is it possible to reach maximum travel speed until the roller table has been lowered to the minimum height.**

**The goods trolley can carry loads of up to 1,200 kg.**

#### Technical Specifications

Minimum height trolley	535 mm
Maximum height trolley	1235 mm
Length roller table	1700 mm
Width roller table	786 mm
Length trolley	2110 mm
Width trolley	810 mm
Charging power *	230 v
Battery	2 x 12 v
Engine	24 v
Tare weight total	570 kg
Max.weight load (WLL)	1200 kg
Speed	0.6 km/hr

\*110 V is available upon request
