

LIFTROLLER

ROLL BAY - TABLE

ROLL BAY - TABLE

The Liftroller Roll Bay - Table is a roller-top extension designed to continue the conveyor line from the Liftroller Wall into the building. Perfect for narrow spaces where trolleys can't go, it allows materials to be rolled further inside before manual handling. With adjustable legs for height alignment and a built-in load stopper for safety, these tables connect easily and support loads up to 1,200 kg—offering smooth, secure, and space-efficient material transfer.

Technical Specifications

Minimum height roller table	930 mm
Maximum height roller table	1225 mm
Width roller table	800 mm
Length roller table	800 mm
Tare weight total	47 kg*
Max. load capacity (WLL)	1200 kg

* Easily disassembled, no tools necessary, allowing for easy carrying in manageable parts.
